1. Coding
2. Keeping up with new Tech news
3. Football
4. Online Gaming
5. Reading mystery novels
6. Ziplining

SKILLS

- **Full-stack Web Development:**
Proficient in both front-end (HTML, CSS, JavaScript) and back-end (Node.js, Express.js) technologies to build robust and user-friendly web applications.

- **Programming Languages:**
Skilled in JavaScript, TypeScript and some Python enabling the creation of efficient and reliable software solutions.

- **Database Management:**
Experienced in working with SQL and NoSQL databases, ensuring proper data organization and retrieval for applications.

- **Problem-Solving:**
Strong analytical abilities to identify and resolve software challenges, optimizing performance and user experience.

- **Agile Development:**
Familiarity with Agile methodologies, collaborating effectively with cross-functional teams to deliver high-quality software on schedule.

- **Version Control:**
Proficient in using Git for efficient code management and collaboration during the development process.

- **Data Analysis:**
Knowledgeable in data analysis techniques, enabling data-driven decision-making and insights for software improvements.
